News - 2008 Group 8 Stock Car Rules Update

Four classes will be set for the 2008 season:

Super A Class: Cars from 2001 forward

A Class: Cars from 1991 to 2000

B Class: Rev Limited BGN type cars

Classic: Cars from 1981 - 1991

Historic Cars Through 1979

Super A Class will run with a weight of 3500 lbs. with an aero package as follows: Front valence and rear spoiler height and size must be period correct as to sanctioning body specifications. Cars will run rev limiter to 8500 maximum .

A Class will run with a weight of 3400 lbs. and the current aero package as outlined in the current rule book. Cars will run rev limiter of 8500 rpm maximum.

B Class will run with a weight of 3400 lbs. with the current aero package and a rev limiter of 7500 rpm.

Classic may run any configuration that was legal at the time of original construction. There is no specific aero package or rev limitation for these cars.

A complete set of rules will be posted in the near future.
